10+

Years in operations & customer support

4+

Years as Resolution Specialist, Amazon

2

Years as cross-functional Operations Manager

50

New hires trained across 2 onboarding classes

PROFESSIONAL PROFILE

Operations and client-support professional with over 10 years of experience across business operations, team leadership, HR administration, recruitment, payroll oversight, and customer service — including more than 4 years with Amazon Operations Services Philippines as a Resolution Specialist and Acting Training Specialist, and 2 years as Operations & Project Delivery Manager at M.A.C. International Inc., where the Accounting Manager and HR Manager reported directly to me and I served as final interviewer for job applicants.

I bring a practical, evidence-based approach to operations and client-support work: gather the facts, design a workable process, communicate clearly, and follow through until the issue is actually resolved — not just acknowledged. Comfortable managing multiple priorities independently in a remote environment.

WHAT I CAN HELP WITH

- Customer support — end-to-end resolution, escalation handling, and case documentation.
- Virtual assistance & administration — data entry, research, document preparation, SOP writing, and task coordination.
- Sales support — needs-based selling, objection handling, and account management (AT&T Small Business, AT&T U-verse).
- Operations management — process design, escalation ticketing systems, cross-functional coordination, HR/payroll oversight, and new-hire training.
- AI-assisted productivity — using AI tools (Claude, ChatGPT) to speed up research, drafting, and documentation, always reviewed before use.

PROFESSIONAL EXPERIENCE

Sales Representative / Customer Service Associate — AT&T Small Business

Fusion CX | May 2026 – Present

- Provide customer support and sales assistance for AT&T Small Business accounts, identifying needs and recommending products, services, and account solutions.
- Handle account concerns and document customer interactions with a strong focus on accuracy and policy compliance.

Resolution Specialist — Escalation Supervisor Role / Acting Training Specialist

Amazon Operations Services Philippines, Inc. | June 2021 – October 2025

- Handled complex, supervisor-level customer escalations requiring policy-based resolution, coordinating with multiple Amazon sites globally to deliver timely outcomes.
- Designed and rolled out the Carrier Deprioritization ticketing process for delivery-related escalations (featured below).
- As Acting Training Specialist, ran onboarding-to-production training for 2 new-hire classes of 25 agents each, plus 2 upskilling classes moving Credit Abuse Prevention (CAP) Associates into Retail CSA roles.
- Built training materials and operational documentation used by other trainers beyond my own sessions, maintained under strict data-handling standards.

Operations & Project Delivery Manager

M.A.C. International Inc. | January 2019 – February 2021

- Provided cross-functional oversight of Accounting, HR, and Operations — the Accounting Manager and HR Manager reported directly to this role, with direct reporting to the company owner.
- Served as final interviewer in recruitment, reviewed payroll-related information prepared by Accounting, and resolved payroll and employee-relations discrepancies.
- Implemented process improvements across departments and monitored performance against business objectives.

Customer Service Associate (Subject Matter Expert) — AT&T U-verse Green

VXI Global Holdings | January 2016 – January 2017

- Part of the pioneer team launching the AT&T U-verse Green sales account; promoted to Subject Matter Expert after 2 months as a CSR.
- Led a team of sales representatives against performance targets, coaching for productivity and maintaining reporting accuracy.

ISO Document Controller

Al Gaswa Steel Industries | 2011 – 2013

- Reported directly to the Projects Manager; maintained the Master Document Register and controlled document creation, revision, and archival per ISO procedure.
- Coordinated directly with the Design, Purchasing, and Sales & Marketing Managers, supporting internal and external audits through to successful ISO certification.

FEATURED PROJECT — CARRIER DEPRIORITIZATION TICKETING SYSTEM

The problem: A recurring escalation pattern — USPS marked customer addresses as “no mailbox,” returning undelivered orders and generating repeat, high-frustration escalation calls.

What I did: Gathered escalation data to confirm the pattern, then proposed and built a ticketing process: once this escalation type was identified, a ticket was routed to the fulfillment center nearest the customer to deprioritize USPS and assign UPS or Amazon Logistics instead for that address.

The result: Reduced repeat escalation calls tied to this failure pattern and kept resolutions aligned with Amazon’s customer-obsession standard — proactively fixing the root cause instead of resolving the same complaint case by case.

TOOLS & TECHNOLOGY

- Productivity suites — Google Workspace (Gmail, Docs, Sheets, Drive) and Microsoft Office (Word, Excel, PowerPoint).
- CRM & case systems — CRM, ticketing/case-management, and e-commerce order-support systems (Amazon operational tools, AT&T account systems).
- AI-assisted workflows — Claude and ChatGPT for research, documentation, and drafting, reviewed and verified before use.

EDUCATION

Technological Institute of the Philippines

BS Chemical Engineering | 1994 – 1999

TARGET ROLES

Assistant General Manager • Operations Manager • Administrative Management • HR & Recruitment Operations • Business Operations

Also open to freelance Virtual Assistant, Customer Support, and Sales Support engagements.

Available to start immediately — I typically respond within 24 hours.
